Environmental Innovations and Climate Change

You too should profit from envietech2010

How can the communities, in view of the ever scarcer resources, guarantee the sustainable supply with water and energy? How to get the waste issue under control? How can employers, in the light of the general development, safeguard jobs and profit from new markets?

envietech2010 offers responses to these and other topical questions of our industrialised society. Launched very successfully in 2008 as a European guiding event in this field, **envietech2010** underlines its role as a pioneer and as an instigator for the growth market of environmental technologies and renewable energies.

By means of creating networks of experts from the economy, science, and development as well as of representatives of regional and municipal associations and international sponsors, **envietech2010** supports the search for sustainable solutions. Other priorities are the acquisition of new partnerships, the strengthening of one's own market position and the opening up of new markets.

Latest technological developments and system solutions are presented within the framework of the exhibition. The congress fora offer the opportunity for an exchange of information at the highest level. The comprehensive offer is supplemented by visits to demonstration plants.

PRIORITIES

The event, which is organised by the ACV, the Austria Center Vienna, in cooperation with the leading players of the environmental technology sector, offers technical exhibitors, as well as congress participants various opportunities to sustainably safeguard the future of one's own enterprise and of one's own community.

- **Environmental technology**
  - Environmental technologies for a sustainable use of settlement areas "Better Life - Better Future"
  - More success by radical innovations
- **Renewable energy**
  - The building as a local energy producer
  - Commercial use of renewable energies
- **Waste and water management**
  - Technological innovations and management techniques in the field of efficient water utilisation
  - Waste flows as sources of raw material and energy
- **Financing of sustainable investments**
  - National subsidisation programmes for enterprises and communities
  - Technology and target-group-oriented financing models
- **Training and further training**
  - New occupational image and holistic academic training for the optimisation of holistic solutions
- **Business Lounge** as a forum for cooperations

Conference language is English with simultaneous interpretation
German – English – German

INTERNATIONAL COOPERATION

For the first time **envietech**[2010] takes place under the joint auspices of the Ministry of Life and the OECD. In this way the international orientation of **envietech**[2010] is underlined.

The OECD is one of the leading international organisations striving for an enhanced use of innovative and sustainable technologies.

With the regularly published OECD Environmental Outlook Report the OECD creates a globally unique basis for combating the most urgent challenges: climate change, loss of diversity of species, water shortage, and health. These are fields for which modern environmental technology can provide decisive answers.

REGISTRATION

Registration:
To registrate for the **envietech**[2010] go to: www.envietech.at

Sponsors package:
Seize the opportunity and make sure still today that you can present your enterprise as a sponsor of **envietech**[2010].
For more information see: www.envietech.at

Exhibition:
Exhibitors' packages possible from 6m² onwards.
For more information see: www.envietech.at

Call for Papers: Submission deadline 15 March 2009.
For more information see: www.envietech.at

Hotel reservation:
At the conference homepage you will find a list of selected Viennese Ecolabel hotels. www.envietech.at

As a climate-friendly congress **envietech**[2010] can be reached easily and comfortably from Vienna airport and all railway stations in Vienna via public means of transport. The next underground station to **envietech**[2010] is VIC Vienna International Center of the Underground line U1 (red line).
