

Smart Water and ICT special session and clustering event in Bari, WDSA 2014

Ten FP7 projects ICeWater, iWIDGET, EFFINET, WatERP, UrbanWater, DAIAD, ISS-EWATUS, Smarth2O, WATERNOMICS, WISDOM, belong to the cluster Information and Communication Technologies for Water Resources Management (ICT for Water). During the cluster meeting in Brussels on 4 February 2014 common dissemination cluster events for 2014 have been planned. One of them will take place during the 16th International WDSA (Water Distribution Systems Analysis) Conference, 14-17 July 2014 in Bari, Italy, <http://www.water-system.org/wdsa2014>. Special session and clustering event will be held on 15 July 2014. Among other ICT for Water roadmap will be presented during that session.

ISS-EWATUS will take part at the conference in Bari and will be represented by two partners University of Silesia (US) and Centre for Research and Technology Hellas (CERTH). US will present report Integrated support system for efficient water usage and resources management, CERTH will present report Urban water demand forecasting for the island of Skiathos. The second special session and clustering event for 2014 on standards and standardisation to be held in Italy, Bologna, 22-24 October 2014, as part of the Water IDEAS 2014 conference <http://www.waterideas2014.com/?lang=en>.
