

Thessaloniki, the Capital City of the Greek North is world known for the Ancient Greek, Roman and Byzantine monuments, the charming shopping thoroughfares, the indulging local cuisine and exciting nightlife. Thessaloniki is a meeting point for the Balkans and its modern rhythms and atmosphere promise a unique experience for all visitors.

There are a lot of challenges in the water sector in the Balkans, especially those associated with cross-border water management issues, which require experience exchange among Water Professionals in our region.

In the following years, Young Water Professionals will undertake initiatives in the Balkan Water Sector and we believe that the IWA Balkan Young Water Professionals Conference 2015 will be a good opportunity for establishing a professional network in the region.

Therefore, we are delighted to announce this event to all interested Young Water Professionals, who are motivated to contribute into the Water Sector of our region.
