

ICC 2012 - Poster Symposia

at the 15th International Congress on Catalysis (ICC 2012) we explore a new form of communication for more specialized topics.

Approximately 10 contributions selected as posters have been grouped to a thematic cluster in which participants interested in the topic can exchange and can share this with other participants. Selected posters are marked with the number of the poster symposia, e.g. PS.07.

Two conveners/organizes will be chosen that have the freedom to arrange a session (poster symposium) lasting 90 minutes.

The organizational form can be very flexible. It might be organized a more conventional with short presentations, but could also be arranged as roundtable discussion.
