Intelligent Cargo for Efficient, Safe and Environment-friendly Logistics

Meet us at our Final Event!
12 – 14 October in Thessaloniki (GR) at ECITL 2011

EURIDICE, the EU lighthouse project on Intelligent Cargo discloses its final results
Our project has built a platform enabling cargo items to interact with systems and users along the logistic chain, and has shown through various industrial demonstrators how this enables faster, more efficient and environment-friendly logistics.
