The right mix of contacts, visibility and business

In Naples the actors of clean energy

## BACKGROUND

The speeding up of the regulations in the energy field (energy efficiency laws, building energy certification, start up of Kyoto Protocol, energy services European directive, etc.), the increase of the oil price and the difficulties with gas supply confirm the need to use renewable sources and high efficiency technologies more and more.

EnergyMed 2007 together with the stakeholders of the field – companies, public authorities, associations, technicians – intends to play an active role in building a sustainable energy scenario in Italy and Mediterranean countries, a geographical area with a strong potential development of renewable.

## KEY ISSUES

- Presentation of state-of-the-art technologies in the field of renewable, energy efficiency, and sustainable mobility
- Promotion of companies at an international level
- Involvement of Mediterranean agencies in the promotion of national and international trade
- Active role of both local and national governments
- Communication as a success factor

## FIGURES OF THE FIRST EDITION

- 6000 mq exhibition space
- 20 workshops and round tables
- 7 international delegations
- 120 national and international exhibitors
- 15.000 visitors
- 17 sponsor
- 32 associations

## TARGET

- Energy and Mobility Agencies
- National and Local Government
- Trade and Voluntary associations
- Transport companies
- Companies for production, distribution and sale of Energy
- Energy Manager, Mobility Manager
- Producers, Installers, Maintenance Staff
- Energy Companies
- Technicians and professionals
- Universities and Research Institutes
- Users
- Utilities
