of the Barcelona Lab
Telefonica Digital

Mario Campolargo

Director Net futures
DG Connect
European Commission

About the conference

The 1st international conference on Internet Science, will be organized from April 10 to 11 in Brussels, under the aegis of the European Commission by the the EINS project, the FP7 European Network of Excellence in Internet Science (<http://www.internet-science.eu>), with the support of KVAB.

This highly multidisciplinary conference will be a unique venue fostering dialogue among scholars and and practitioners belonging to various disciplines: Computer Science, Sociology, Art, Mathematics, Physics, Complex systems analysis, Psychology, Economics, Law, Political Science, Epistemology, etc.

It will also provide the EINS Network of Excellence with an opportunity to interact with external stakeholders, detail project objectives and methodological approach, and showcase its first results.

The event will start on April 9 at 18:30 with a welcome reception, and will end on April 11 in the afternoon.

The conference is open to any organizations and individuals interested in the event topics.

Only limited registration fees are requested to attend it in order that they are not an obstacle to registration, thanks to the financial support of the European Commission, made available through the EINS FP7 project. These fees cover in particular access to the venue, to the welcome cocktail of April 9, all coffee-breaks and lunches of April 10 and and 11, and the dinner of April 10.

Please note that pre-registration is compulsory since registration may be closed prior to the event date due to room capacity constraints.
