Dear members of the automotive society

The Vietnamese Society of Automotive Engineers is proud to host the 15th Asia Pacific Automotive Engineering Conference in Hanoi-Vietnam, 26-28 October 2009. APAC 15 will focus on solutions for sustainable mobility concepts for people and goods in all areas of passenger car, truck and bus, transportation as part of total mobility concepts. Emphasis will be placed on the development of future powertrain systems, conservation of the environment and energy resources as well as new vehicle concepts, materials, electronics and essential improvements in vehicle safety. Special attention will be devoted to the product creation process including virtual reality techniques, simulation and testing methods.

FISITA Patronage

FISITA is the international federation linking the national automotive engineering societies in 39 countries. FISITA was founded in 1948 as a neutral forum for the exchange of technical knowledge on every aspect of vehicle design, development and manufacture. FISITA is a non-profit organisation committed to helping create efficient, affordable, safe and sustainable automotive transportation. www.fisita.com

Conference Highlights

- Plenary Sessions
- Technical Sessions
- Technical Visits
- Reception and Ceremonies
- Social Events and Tours
- Exhibition

Requirements for Paper Abstracts:

- 200 - 300 Words
- Paper Title
- Subject Area
- Author's Name
- Author's Affiliation
- Contact Address
- Telephone Number
- Fax Number
- Email

Important Dates

Deadline for abstract submission:	Mar. 20,2009
Selection by local societies:	Apr. 20,2009
Notification of Acceptance:	May. 20,2009
Approval by VSAE & Organizing:	Jun. 20,2009
Deadline for final manuscript:	Aug. 20,2009

Congress Topic

● Track 1: Driver/vehicle interface, information and assistance system

- Driver assistance & Information
- Noise & Vibration
- Human acceptance of driver assistance systems
- Human and information systems in automobiles
- Transmission Systems

● Track 2: Powertrain Technology:

- Engine Design
- Hybrid and Electric Power System
- Future powertrain solutions
- Strategy and engines for future fuels
- Innovative engine and transmission systems

● Track 3: Vehicle safety

- Accident analysis: Methodology and analysis tools; Assessment and analysis for accident causation; Effectiveness of safety measures.
- Driver assistance: Accident avoidance
- Advanced safety systems
- Preventive safety systems: Pre-Crash; Integrated safety
- Occupant and partner protection
- Advanced occupant protection in all accident modes; Pedestrian protection.
- Personal/Public/Freight transportation
- Vehicle security and Occupant safety

● Track 4: Vehicle Design and Manufacturing

- Body Structures
- Aerodynamics
- Advanced Materials
- Sustainable Development and Recycling
- Manufacturing Systems
- International standardisation
- Production solutions
- Diagnosis, service and recycling

● Track 5: Chassis development for passenger cars, trucks and buses

- Vehicle dynamics including driver assistance
- Chassis system integration
- Suspension parameter control
- Comfort assessment and improvement
- Suspension systems for trucks and buses
- Vehicle Ride and Handling
- Intelligent Safety Systems

● Track 6: Body design for passenger cars, trucks and buses

- Product development methods
- Modularisation
- Weight reduction
- Design
- Production
- Comfort and convenience

● Track 7: Environment

- Fuel and CO₂ efficient powertrains
- Strategy for future ultra low exhaust emission limits
- Advanced fuel efficient and cost effective hybrid systems
- Fuel cell progress
- Fuel resources (Biofuels; Alternative fuel, CNG, synfuel Hydrogen)

● Track 8: Electronics

- Electronics for powertrain, chassis driver assistance
- Energy management
- International standardization

Track 9: Testing & Simulation

- Vehicle energy management, incl. hybrid
- Testing facilities for driver assistant systems
- Special applications and future topics
