Sustainable Energy Europe: a European Campaign to raise awareness and change the landscape of energy

The Sustainable Energy Europe Campaign has been set up as the third pillar – after legislation and support programmes – of the EU's sustainable energy policy. It represents a continuous communication effort that aims to inspire Europe's Citizens to be smart in using energy.

The **EU Sustainable Energy Week (EUSEW)** is the event for EU policy on sustainable energy, dealing with major energy issues and the fight against climate change. Set in the context of the Sustainable Energy Europe Campaign, the EUSEW brings together thousands of private and public decision-makers – both in Brussels and across Europe. These events are unique opportunities to keep in touch with the latest policy and market developments, as well as best practice on energy efficiency, renewable energies and clean transport.

We invite you to join us in the Campaign by becoming a Partner or organising an Energy Day. Together we can make a difference.
