

Plenary Lectures Programme

Integration of chemical oxidation processes with biological and physical processes for water treatment

D.F. Ollis, North Carolina State University, USA

Catalytic oxidation for abatement of pollutants from industrial wastewaters

J. Levec, University of Ljubljana, Slovenia

Electrochemical oxidation of organic pollutants for wastewater treatment

C. Comninellis, Swiss Federal Institute of Technology, Switzerland

Solar photocatalysis: Cleaning polluted water, air and surfaces with sunlight

D. Bahnemann, University of Hannover, Germany

The sonochemical decomposition of water-borne organic pollutants

F. Grieser, University of Melbourne, Australia
