

We accelerate factories through robotics.

The ambition of the DIH² project is to:

- Improve the cost-effectiveness of advanced robotics solutions.
- Drive growth of the European manufacturing robotics market.
- Generate innovation that maximises productivity and optimises agility in over 300,000 manufacturing SMEs and Mid-Caps across the European Union.

DIH² is a network of 26 European Digital Innovation Hubs (DIHs). Our objective is to grow this network to over 170 DIHs by 2022.

— Receive up to €248,000 equity-free funding.

Robotics can increase the productivity and cost-efficiency of factories. Equity-free funding is available for the following types of organisation:

1. Manufacturing Small and Medium-sized Enterprises (SMEs) with up to 500 employees and a maximum of €100 million in turnover.
2. Systems integrator and technology providers specialised in technology transfer or integration to end users (this includes research and technology organisations, competence centres, Mid-Caps or start-ups).

The process for managing funding applications is in two stages:

Deadline (Stage 1): **31/10/2019** (13:00 Central European Time)

Deadline (Stage 2): **27/2/2020** (13:00 Central European Time)

For more information on equity-free funding and the application process, go to: www.dih-squared.eu
